

CETRORELIX
Preferred GnRH-antagonist

R **Cetrostar**TM
Cetrorelix 0.25 mg Injection

- Prevents the pre-mature LH surge and luteinization
- Use in COS of IUI increases pregnancy rates
- Low risk of OHSS when compared with triptorelin

LEUPROLIDE DEPOT
Potent GnRH-agonist

R **Luprosar**TM
Leuprolide Depot 3.75 mg Injection

- Improves implantation rates with low risk of OHSS
- Reduces the ovarian steroidogenesis in vivo when given with GnRH

With Sarabhai's Quality Assurance

Medicine you can trust...

Male Bio-energizers

Oligosar^{*}

Levocarnitine 500mg+Ubidecarenone100mg+ Zinc 12.5 mg and Lycopene(10%)2.5 mg Tablet

Androsar^{*}

Testosterone Undecanoate 40 mg Soft gel Capsule

The Meaningful  **Life**

Growth Drivers

Calnemia^{*}

Calcium carbonate625mg+Vitamin D3 125IU Effervescent Tablet

promolan^{*}

Powder

MOM

Protein Food Supplement Fortified with Carbohydrates, Vitamins, Minerals, and Antioxidants

Pro-pregnancy hormones

Gestosar^{*}

Natural Micronized Progesterone 400 mg Soft Gelatin Tablet

Medicine you can trust...

The Meaningful  **Life**

Potent GnRH-Analogues

Luprosar^{*}

Leuprolide Acetate 3.75mg Depot Inj

Cetrostar^{*}

Cetrorelix 0.25 mg Inj

Highly purified gonadotrophins

Menosar^{*} **HP**

Human Menopausal Gonadotrophin 75/150 IU Inj

Folisar^{*} **HP**

Follicle Stimulating Hormone 75/150 IU Inj

Humosar^{*} **HP**

Human Chorionic Gonadotrophin 5000/10000 IU Inj

"Sperm quality deteriorates during summer"

In Oligospermia, Asthanospermia and Azoospermia

R **Oligosar**TM

Levocarnitine 500 mg + Ubidecarenone 100 mg + Zinc 12.5 mg and Lycopene (10%) 2.5 mg

The complete bio-energizer

-  Levo-carnitine promotes LCFA transport into sperm cell mitochondrial matrix.¹
-  Co-Enzyme Q10 promotes electron transport in sperm cell mitochondrial complex²
-  Zinc promotes spermatogenesis and sperm motility³
-  Lycopene promotes sperm dynamics and fertilization rates⁴.

With double strength of Co-enzyme Q-10

High Purification of hCG

Crude hCG API

containing few hundreds of IU of hCG/mg (proteins) with proteaceous impurities

Purification Process

Solvent precipitation, fractionation, ultra filtration, ion exchange and affinity chromatography

HP Gonadotrophin

Several thousands of hCG IU/mg (proteins), free from proteaceous impurities

- EMBRYO STAGE**
 - Maintains corpus luteum
 - Ensures adequate estrogen & progesterone
- FOETAL STAGE**
 - Protects foetus by repelling immune cells of mother¹
 - Facilitates trophoblast invasion
- FSH**
 - Produces estradiol during follicular phase
 - Produces progesterone during luteal phase
- LH**
 - Promotes formation of corpus luteum
 - Triggers ovulation

Free from EGF contamination and high hCG beta core levels

Purified by Immunoaffinity chromatography

SC administration results in an increase of FSH Cmax by 35% and AUC by 20%

HumosarTM **HP**

Human Chorionic Gonadotrophin 5000 / 10000 IU

MenosarTM **HP**

Human Menopausal Gonadotrophin 75 / 150 IU

FolisarTM **HP**

Follicle Stimulating Hormone 75 / 150 IU
